(イ) 次の英文は、職場体験後にカオリ (Kaori) が、グローバルカメラカンパニーのアンダーソンさん (Mr. Anderson) に送ったお礼状です。英文を読んで、あとのNo.1 とNo.2 の問いに答えなさい。

Dear Mr. Anderson,

Thank you so much for having me at your company. It was a great experience, and I learned a lot of things.

On the first day, you gave me a chance to talk with your *engineers. I asked them questions and got answers from them. I was surprised to know so many skills and new technologies were needed to make good cameras.

On the second day, I joined an online event for fans around the world as a staff member. At the event, you *introduced new cameras to the fans. Then, they asked a lot of questions about those cameras. I didn't know how to answer the questions. You also listened to their opinions. I realized that your company collected hints from these fans to make good cameras.

On both days, I met a lot of people from different countries at your company. Even the Japanese staff members spoke to me in English. They asked me how I felt about your company's cameras. It was not easy to share my ideas with others in English, but I tried it. Through this experience, I think I improved my English.

Now, I am making a presentation about this program. In the presentation, I'm going to talk about **the things I learned**. I'm sure my classmates will become interested in your company.

Thank you again for the wonderful experience.

Best regards,

Kaori

問7 次の(ア)の英文と活動一覧 (Activity List)、(イ)の英文とメモ (Memo) やコメント (Comments) について、それぞれあとの **Question** の答えとして最も適するものを、1～5の中からそれぞれ一つずつ選び、その番号を答えなさい。

(ア)

Maki and Beth are classmates at Kaede High School. Beth is from the U.S. They are talking about Activity List on the third day of their school trip. They need to choose one of the three plans.

Maki : Beth, which activity would you like to try?

Beth : I've never touched dolphins, so how about the plan with Kamome *Aquarium?

Maki : That activity sounds good, but I'm afraid of looking at the view from the tall tower.

Beth : I see. Let's check the other plans.

Maki : Thanks. Would you like to try sports on the beach?

Beth : Yes, but I always went fishing with my family in the U.S., so how about the last one?

Maki : In this plan, we can learn the local dances and make a gift for our families. Are you interested in learning about traditional culture?

Beth : Yes. How about you?

Maki : Me, too. Let's join this plan.

Beth : Sounds great!

Activity List

Plan	Place	9 a.m. - 11:30 a.m.	1 p.m. - 3:30 p.m.
		You can	
Plan A	Nagisa Beach	· Enjoy some sports on the beach	· Take a boat and go fishing in the sea
Plan B	Kamome City	· Walk around the city and see the good view from Kamome High Tower	· Watch and touch dolphins at Kamome Aquarium
Plan C	Momiji *Village	· Learn traditional local dances at the tourist center	· Make an original Japanese cup at a local house in the village

Question : Where will Maki and Beth go in the afternoon on the third day of their school trip?

1. Nagisa Beach.
2. Kamome Aquarium.
3. Kamome High Tower.
4. The tourist center in Momiji Village.
5. A local house in Momiji Village.

*Mika is a member of the library *committee in Kamome High School. Last year, her school started the *e-book borrowing system in the school library. Last month, she *conducted a survey about this system. She got six comments from the survey and took a memo.*

Memo

According to the comments, don't use this system now, though they tried it before. So, next week, I'll talk with them to understand more about their problems.

Comments

From Ms. Honda (Teacher)

My eyes are not good, so it's difficult for me to read small words. With paper books, I need special glasses, and I get tired easily. With this system, I can make the words bigger and change the colors, so reading has become easier.

From Olivia (Student)

I like reading very much, so I used this system before. But it was not easy. When I tried it at home, I didn't know how to use it well or who could help me. I've stopped using it.

From Takuya (Student)

My club activities keep me busy. I don't have time to use the school library while it is open. With this system, I can read books on my *tablet anywhere, so I read more books.

From Hana (Student)

I always look for new stories. A few years ago, I often bought more than ten books in a month. However, I couldn't do that after my *bookshelf at home became full. With this system, I can find new stories easily and read them without worrying about space at home.

From Mr. Green (Teacher)

This system can recommend e-books to us. At first, I liked this idea because I wanted to try something new. However, when I tried this system, the recommended book was not interesting. Since then, I haven't touched this system.

From Ken (Student)

I have never tried this system because it's not necessary for me. I like reading my favorite books many times. My bookshelf in my room is full of them. When I go out, I always take one with me. When I read it again and again, I can really feel that the book is mine.

Question : What will be in ?

1. two students
2. one student and two teachers
3. three students
4. one student and one teacher
5. two students and one teacher

問8 次の英文を読んで、あとの(ア)~(エ)の問いに答えなさい。

Akira and Emily are Kamome High School students. They are talking in the classroom after school. Then, Mr. White, their English teacher, talks to them.

Mr. White: Akira and Emily, what are you talking about?

Akira: We're talking about our class movie for next month's school festival. We are afraid that we won't finish making it.

Mr. White: Oh, what happened?

Emily: We have already taken a lot of pictures and videos, but we don't have enough time to *edit them. We have to finish making it in two weeks. So, I think we should use *generative AI for our movie.

Mr. White: Do you know how to use generative AI, Emily?

Emily: Yes. We learned how to use it in our *Information class. After that, I became interested in it. I think it will help us edit the pictures and videos for the movie.

Akira: I think it'll be better for us to make the movie without it.

Mr. White: Why do you think so, Akira?

Akira: Because it is important to do all the work by *ourselves when we try to make something original.

Emily: I understand. But to edit the movie all by ourselves is not the only way to make something original. We can control how generative AI can support us. If we don't finish making the movie, we cannot do anything in the festival. Our goal is the same, and it is to make the *visitors happy with our original movie, right?

Akira: You're right. But we need to understand how our classmates feel about this topic. Some students may not agree to use generative AI. Mr. Takeda, our Information teacher, showed us this *graph in his lesson. ① Graph 1 shows that around 30% of the students in this school don't want to use generative AI for studying. Some of my classmates may worry that they won't improve their thinking skills because of generative AI.

Emily: I don't agree. Look at Graph 1 again. Less than 10% of the students feel worried about using generative AI. Look at ② Graph 2 I found on the internet. It shows the *percentage of students who have used generative AI for studying at home. According to this graph, high school students used generative AI more than elementary school students and junior high school students in both 2023 and 2024. In 2024, high school students' *usage was higher than in 2023. I know students have different opinions about this topic, but I think we cannot stop this *trend, so we need to think about a good way that works for everyone.

Akira: OK. Then, let's talk about the ways of using generative AI with other classmates later.

* edit ~ : ~を編集する generative AI : 生成AI Information : 情報 (高校で学ぶ教科の一つ)

Emily: Yes, let's! Thank you.

Mr. White: Great! I hope you will make a good movie with your classmates.

Two weeks later, after the school festival, Mr. White talks to Akira and Emily.

Mr. White: Great job! I enjoyed your movie. How did your class use generative AI for the movie?

Akira: Our class used it only in a limited way.

Emily: After our class talked about generative AI, we made these three rules:

1. Use generative AI only for editing pictures and videos.
2. Check every scene generative AI made.
3. Try something new after generative AI gives us time.

Akira: For example, generative AI quickly *arranged the pictures and videos of the actors very well *based on the story we made for the movie.

Emily: With the help of generative AI, we finished editing the movie five days before the festival! So, generative AI .

Mr. White: Cool! What did you use the time for?

Akira: We decided to add one more scene. Do you remember the last scene?

Mr. White: Of course! I liked that scene! I was surprised that everyone in the movie started to dance with the *sunset behind them at Kamome Beach.

Emily: That was my idea! I got the idea while I was talking with my friends.

Mr. White: Wow! Was it difficult to take the video for that scene?

Emily: Yes. We practiced dancing, went to the beach, and waited for the best time for the scene.

Akira: A lot of visitors said to us, "The movie was great!" I felt happy by listening to those words. Generative AI helped us make our original movie and good memories.

Emily: Our class talked about the ways of using generative AI and worked together to make the visitors happy with our original movie.

Mr. White: Great! I'm glad that you had a great experience with your classmates.
